

Benefits

Skylatch® is a new concept in smart locking. Rather than replacing your entire lock and handle set, Skylatch® is a smart lock upgrade for conventional 570 mortice locks. It does not interfere with the current door keying which continues to work in parallel with the Skylatch's secure mobile access.

Skylatch® 570V sits on the secure side of the door leaving the outer appearance unchanged. This allows you to scale from a single residence to the whole building, without ever altering the hallway aesthetic.

The 570V can fit to both separate key / handle sets or escutcheons.

Variants

The unit is left and right handed configurable via app.

The cover is available in satin chrome, white or black powder coat. For scale projects, custom powder coat runs can be ordered.

Supplied CAM tested with NOVAS, Lockwood, Lockton, and Dormakaba 570 Mortice Locksets.

Skylatch-570V Battery powered, BLE

Specifications

4 x AAA battery back up, approx 12 months battery life.

Bluetooth low energy (BLE) control and management.

Fire Rated. Tested by Jensen Hughes to AS 1530.4:2014.

eKey communications are end-to-end encrypted, using military grade AES standards. Verroo app or 5dkey cloud / app options.

Z cam / slide bar configuration tested to 100K duty cycles.

Working temperature range is -25°C to +60°C.

Verroo App

Operate Skylatch® with Verroo's own license free App available on iOS and Android.

The native Verroo app is a license free, cloud-free App. This management solution allows both seamless app access and the generation of up to 1000 fully encrypted ekeys.

Owners and assigned admins can configure ekeys with unrestricted access, or time-of-day, day-of-week and expiry date/time restrictions.

5dkey App / Cloud

Operate Skylatch® with 5dkey scalable multi-res and commercial solution.

5dkey is a scalable access control cloud to suit build-to-rent, student accommodation, and other multi-site and multi-door applications including common area reader control, all from the one app. Learn more at <https://5dkey.com>
